## CONDITIONAL AUCTION TERMS AND CONDITIONS

Introduction These Conditional Auction Terms and Conditions govern the conduct of conditional auctions conducted by Advanced Property Auctions. Any property sold by Advanced Property Auctions either Online or in person which is expressed to be Conditional is governed by these conditions.

There are three sections:

**Glossary** The glossary gives special meanings to certain words used in the conditions.

**Auction Conduct Conditions** The Auction Conduct Conditions govern the relationship between the auctioneer and anyone who participates in the auction. They apply wherever the property is located and cannot be changed without the auctioneer's agreement.

**Reservation Conditions** If you are the successful bidder in a conditional auction for a property then you must enter into a reservation agreement and will be bound by the reservation conditions relevant to that Property.

### Important Notice

Before bidding for a property, a prudent Buyer should carry out their own due diligence, including but not limited to:

- Read these Conditional Auction Terms and Conditions and the Buying section of the Auctioneer's Website
- Check the Buyer Information Pack including the Special Conditions for the Property
- Take advice from professionals such as a conveyancer, a financial advisor, or a surveyor where appropriate.
- Have finance available for the Purchase Price, the Reservation Fee, and any additional fees stated in the Special Conditions These Conditions assume that a Buyer has acted as a prudent Buyer, and bidding without doing so is at your own risk.

### 3.13 CONTAMINATED LAND

#### Informative

This reply is based on and limited to the information available to us at the time the search is answered.

A negative reply does not imply that the property is free from contamination or from risk to it, and the reply may not disclose steps taken by another council in whose area adjacent or adjoining land is situated.

The Environment Act 1995 introduced a contaminated land regime forming part IIA of the Environmental Protection Act 1990 which became effective in April 2000. This change saw owner/occupiers become potentially liable for clean up costs as a Class B "Appropriate Person".

Local Authorities are now responsible for preparation of reports on contamination in their respective areas and their subsequent local strategy. Local Authorities will intermittently inspect their areas in respect of contamination and take action against those seriously contaminated areas. Registers of remediation notices and contaminated land identified under s.78R must also be kept. These registers do not form lists of contaminated sites; rather sites where Remediation Notices have been served. It is intended that information will also be included with regard to the condition of the land in question.

**Do any of the following apply (including any relating to land adjacent to or adjoining the property which has been identified as contaminated land because it is in such a condition that harm or pollution of controlled waters might be caused on the property)?**

**(a) a contaminated land notice**

No.

The Register maintained under S.78 of the Environmental Protection Act 1990 is currently being compiled.

**(b) (i) a decision to make an entry**

No

**(b) (ii) an entry**

No

**(c) consultation with the owner or occupier of the property conducted under section 78G(3) of the Environmental Protection Act 1990 before the service of remediation notice**

No

## 3.14 RADON GAS

### Informative

This reply is based on and limited to the information available to us at the time the search is answered.

"Radon Affected Area" means a part of the country with a 1% probability or more of present or future homes being above the Action Level. Such areas are designated by the Health Protection Agency which also advises Government on the numerical value of the "Radon Action Level" (the recommended maximum radon concentration for present homes expressed as an annual average concentration in the home. Radon concentrations above the Action Level should be reduced below it and become as low as reasonably practicable).

The areas are identified from radiological evidence and are periodically reviewed by the Health Protection Agency or its predecessor the National Radiation Protection Board. Existing homes in Affected Areas should have radon measurements.

The present owner should say whether the radon concentration has been measured in the property; whether the result was at or above the Action Level and if so whether remedial measures were installed and whether the radon concentration was retested to assess the effectiveness of the remedy.

Radon preventative measures are required for new buildings in higher risk areas. For new properties the builder and/or the owners of properties built after 1988 should say whether protective measures were incorporated in the construction of the property.

**Do records indicate that the property is in a "Radon Affected Area" as identified by the Public Health England or Public Health Wales?**

No  
(This answer is based on Landmark datasets as at 12/03/2026)

## Common Terms

### Section 38 - Highways Act 1980

Section 38 relates specifically to the creation of a new highway upon land in the ownership of anyone other than the highway authority. It is an agreement between the land owner and the authority for the construction of a new highway and the ultimate adoption by the authority as a public highway. The agreement secures a bond for the cost of the works, to enable completion of the works by the authority upon default by the developer.

### Section 278 - Highways Act 1980

Section 278 covers proposed highway works within the existing highway (modification of highways not general excavation for different reasons). This would generally encompass works such as new traffic islands, roundabouts, junction improvements, carriageway alignment etc. and is often accompanied by a Section 38 Agreement for works outside the highway.

### Section 219 - Highways Act 1980

Section 219 - secures payment of the expenses for carrying out street works in private streets next to new buildings. This makes sure that the Local Authority can complete the roadworks if the developer is unable. If work is started on a building before the appropriate sum has been paid or secured, the owner may be liable and incur a fine.

### Section 220 - Highways Act 1980

Section 220 - is served following receipt of Building Regulations approval specifying the amount to be deposited or secured in respect of the street works charges for those dwellings for which approval has been granted which must be paid before building works commence.

### Section 104 - Water Industry Act 1990

Section 104 relates to the construction of new sewers by a developer, to be offered for adoption by the Water Authority as public sewers. The agreement secures a bond for the cost of the works, to enable completion of the works by the company upon default by the developer.

### Section 106 - Pre-planning Agreement

Section 106 of the Town and Country Planning Act 1990 allows a local planning authority (LPA) to enter into a legally-binding agreement or planning obligation, with a land developer over a related issue. The obligation is sometimes termed as a "Section 106 agreement".

### Tree Preservation Orders

Tree Preservation Orders (TPOs) are made under the Town and Country Planning Act 1990 and the Town and Country Planning (Trees) Regulations 1999.

### Listed Buildings

Listed Buildings - A listed building in the United Kingdom is a building or other structure officially designated as being of special architectural, historical or cultural significance.

### Community Infrastructure Levy

The Community Infrastructure Levy (CIL) is a planning charge based on legislation that came into force on 6 April 2010. When adopted, a CIL levy allows the Council to raise contributions from new development to help pay for infrastructure that is needed to support planned growth. CIL contributions can be used to supplement other funding streams and can wholly or partly fund a variety of strategic infrastructure projects ranging from transport, green infrastructure, flood defences, education and health, subject to pooling restrictions. Where a CIL charging schedule is in place, it largely replaces Section 106 Obligations in delivering strategic infrastructure. However, s106 would still be used for affordable housing and site development-related infrastructure requirements that are deemed necessary to make a development acceptable. Some developments would pay both Section 106 and CIL, but they would fund different types of infrastructure. Contributions may also be sought for Section 278 of the Highways Act where modifications are required to the highways network.

### Conservation Areas

Conservation Areas - Local authorities have the power to designate as conservation areas any area of "special architectural or historic interest" whose character or appearance is worth protecting or enhancing.

### Planning permission

Planning permission or planning consent is the permission required in the United Kingdom in order to be allowed to build on land, or change the use of land or buildings.

### Planning Info Graphic

- Large developments: 10 or more houses (or 1-9 houses if value is greater than £1m) and all other projects with a value greater than £250,000.
- Small developments: 3-9 houses or other developments with project value of less than £250,000.
- House Extensions or new builds searched to 125m.

Please note the planning records were extracted at the time the application was submitted, the application details can be found by entering the application reference manually into the Local Authority's planning website.

The Info-graphic is using Local Authority planning information supplied and processed by Glenigan dating back 10 years, this information is designed to help you understand possible changes to the area around the property. Please note that even successful applications may not have been constructed and new applications for a site can be made if a previous one has failed. We advise that you use this information in conjunction with a visit to the property and seek further expert advice if you are concerned or considering development yourself.

## Questions in detail

### 1 Please provide a copy extract from the public sewer map

Answer: An extract of the sewer map has been provided.

#### Informatives

The utility company is not responsible for private drains and sewers that connect the property to the public sewerage system and does not hold details of these; therefore they are not shown on the plan. Section 104 sewers are not shown on the plan.

### 2 Does foul water from the property drain into the public sewer?

Answer: Records indicate that Foul water from the property does drain to a public sewer – please refer to the seller's water/utility bill for proof of connection. Please refer to the attached plan for the location of the nearest public sewer \*(not to scale).

#### Informatives

If foul water does not drain to the public sewerage system, the property may have private facilities in the form of a cesspit, septic tank or other type of treatment plant. The utility company is not responsible for the drains and sewers that connect the property to the public sewerage system, and does not hold the details of these. The property owner will normally have sole responsibility for private drains serving the property and may have shared responsibility with other users if a private sewer serves the property. These may pass through land outside of the control of the seller; the buyer may wish to investigate whether separate rights or easements are needed for their inspection, repair or renewal.

### 3 Does surface water from the property drain into a public sewer?

Answer: Records indicate that surface water from the property does drain to a public sewer – please refer to the seller's water/utility bill for proof of connection. Please refer to the attached plan for the location of the nearest public sewer \*(not to scale).

#### Informatives

In some cases, the utility company's records do not distinguish between foul and surface water connections to the public sewerage system. If, on inspection, the buyer finds that the property is not connected for surface water drainage, the property may be eligible for rebate of the surface water drainage charge. Details can be obtained from the water company. The water company is not responsible for the drains and sewers that connect the property to the public sewerage system, and does not hold the details of these. The property owner will normally have sole responsibility for private drains serving the property and may have shared responsibility with other users if a private sewer serves the property. These may pass through land outside of the control of the seller; the buyer may wish to investigate whether separate rights or easements are needed for their inspection, repair or renewal.

### 4 Is any sewer serving, or which is proposed to serve, the property subject to a current statutory adoption agreement or an application for such an agreement ?

Answer: No. The utility company's sewer records indicate, sewers serving the property or existing development are not subject to an application or charge relating to adoption under Section 104 of the Water Industry Act 1991.

#### Informatives

**SECTION 104 AGREEMENT-** an agreement made between, a housing developer and the sewerage undertaker, under section 104 of the Water Industry Act 1991, for the adoption of sewers intended to serve a new development. A bond to guarantee proper performance by the developer of their obligations often supports the agreement. Where the property is part of a very recent or ongoing development and the sewers are not the subjects of an adoption application, buyers should consult with the developer to ascertain the extent of private drains and sewers for which they will hold maintenance and renewal liabilities. Final adoption is subject to the developer complying with the terms of the adoption agreement under section 104 of the Water Industry Act 1991. Where the property is part of an established development it would not normally be subject to an adoption agreement under section 104 of the Water Industry Act 1991.

### 5 Does the public sewer map show any public sewer, disposal main or lateral within the boundary line of the property?

Answer: It has not been a requirement for water companies to keep up-to-date public sewer records; therefore it is possible for unidentified sewers to exist within the boundary line of the property. For the matter of this report – Available records indicate that there is not a public sewer, disposal main or lateral drain within the boundaries of the property.

#### Informatives

The boundary of the property has been determined by reference to the Ordnance Survey record. Please note that from 1st October 2011 the majority of private sewers and lateral drains connected to the public network as of 1st July 2011 will be transferred into public ownership and therefore there may be additional public assets within or close to the boundary which may not be shown on the public sewer plan. The presence of a public sewer running within the boundary of the property may restrict further development; the water company has a statutory right of access to carry out works on its assets, subject to notice. This may result in employees of the water company or its contractors needing to enter the property to carry out work. A section 104 sewer record is not an 'as constructed' record. It is recommended that these details be checked with the developer.

**6 Does the public sewer map show any public sewers within 100 feet (approx 30.487 metres) of any buildings within the boundary of the property?**

**Answer:** Records indicate that there is a public sewer located within 30.487 metres (100 feet) of a building within the boundary of the property.

**Informatives**

*The presence of a public sewer within 100 feet (approximately 30 metres) of the building(s) within the property can result in the local authority requiring a property to be connected to the public sewer. The measure is estimated from the centre of the property or land shown on the Ordnance Survey record. A section 104 sewer record is not an 'as constructed' record. It is recommended that these details be checked with the developer.*

**7 Please advise who the sewerage undertaker is:**

**Answer:** Yorkshire Water

**Informatives**

*The utility company is not responsible for the drains and sewers that connect the property to the public sewerage system, and does not hold the details of these. The property owner will normally have sole responsibility for private drains serving the property and may have shared responsibility with other users if a private sewer serves the property. These may pass through land outside of the control of the seller; the buyer may wish to investigate whether separate rights or easements are needed for their inspection, repair or renewal.*

**8 Which company supplies water to the area?**

**Answer:** Yorkshire Water

**Informatives**

*The utility company is not responsible for private supply pipes connecting the property to the public water main and does not hold details of these. These may pass through land outside of the control of the seller; the buyer may wish to investigate whether separate rights or easements are needed for their inspection, repair or renewal.*

**9 Is the property connected to a mains water supply?**

**Answer:** Records indicate that the property is connected to the mains water supply – please refer to the seller's water/utility bill for proof of connection. Location of nearest water supply is shown on attached plan \* (not to scale).

**10 Are there any water mains, resource mains or discharge pipes within the boundary of the property?**

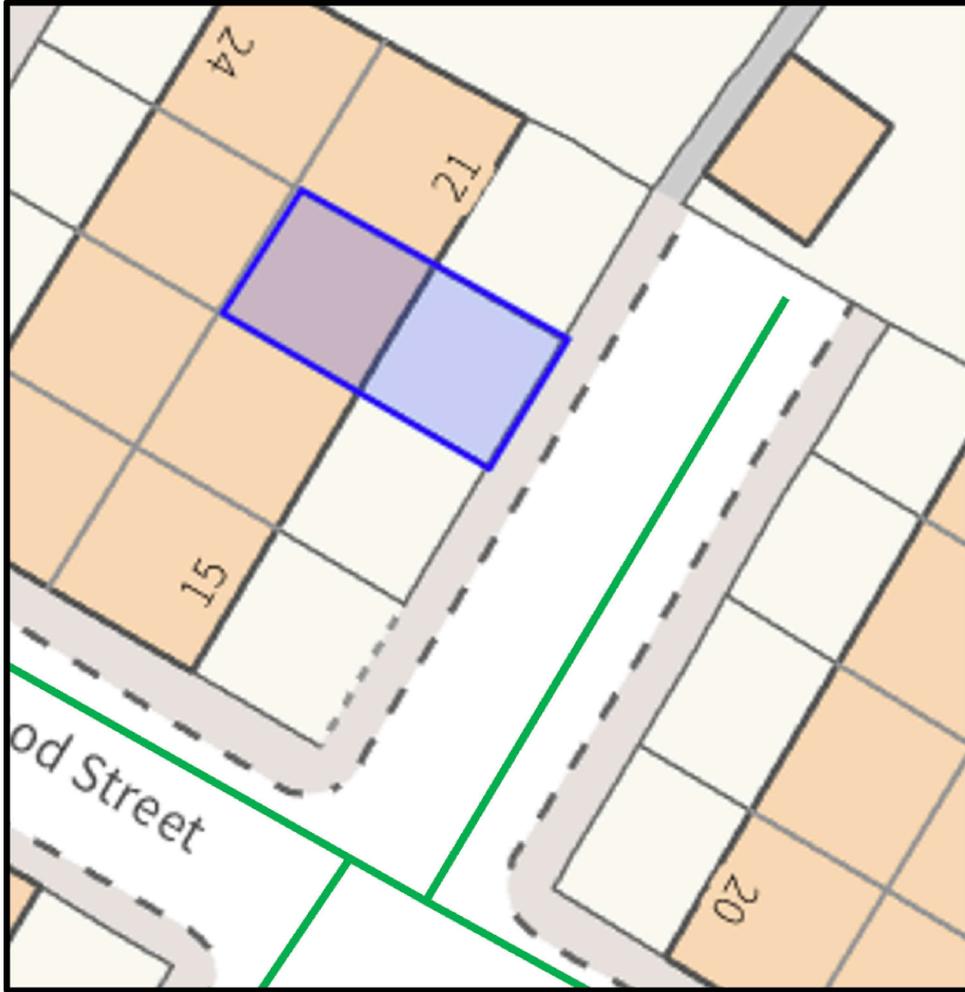

**Answer:** Records do not indicate that there are any water mains, resource mains or discharge pipes within the boundaries of the property.

**Informatives**

*The boundary of the property has been determined by reference to the Ordnance Survey record. The presence of a vested water main within the boundary of the property may restrict further development within it. The water company has a statutory right of access to carry outwork on its assets, subject to notice. This may result in employees of the water company or its contractors needing to enter the property to carry out work.*
